Education

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE ENGINEERING, <i>Guru Gobind Singh Indraprastha University</i> CGPA: 8.604	09/2022 – Present Delhi
Senior Secondary, <i>Andhra Education Society, CBSE Affiliated</i> Percentage:83.6	2022 Delhi
Secondary, <i>Andhra Education Society, CBSE Affiliated</i> Percentage:90	2020 Delhi

Skill-Set

Programming Languages C++, Python	Web Development Skills Frontend: HTML, CSS, JavaScript, React.js Backend: Python (Flask), REST APIs, Database Connectivity, Server-Side Logic
Machine Learning & AI: Supervised & Unsupervised Learning, Natural Language Processing (NLP), Model Training & Evaluation, Logistic & Linear Regression, AI-driven Automation Systems	Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab
Core Computer Science Concepts: DSA, OOP, DBMS, OS, Computer Networks	Soft Skills Problem Solving, Analytical Thinking, Team Collaboration, Adaptability, Technical Documentation

Projects

AI Resume Screener & Analyzer — Python, Flask, NLP, Scikit-learn Developed an AI-powered system to analyze and rank resumes based on job descriptions. Implemented keyword extraction, text classification, and ranking algorithms to score resumes by relevance. Integrated Flask backend with real-time PDF upload, result visualization, and CSV download feature.	10/2025 – 11/2025 Remote
Loan Approval Prediction System — Python, Flask, Scikit-learn, Pandas, HTML, CSS Built an ML-based system to predict loan approval based on applicant data such as income and credit score. Utilized logistic and linear regression models for eligibility and loan amount prediction. Integrated Flask web interface for dynamic user input and result display. Github Repository 🔗	07/2025 – 08/2025 Remote

Internship

Data Science Intern — CantiLever Pvt. Ltd. - Worked on data analytics and machine learning projects focused on extracting actionable insights from complex datasets. - Applied Python, Pandas, and Scikit-learn for data preprocessing, visualization, and model development. - Supported automation of reporting workflows, improving efficiency and analytical accuracy.	
Artificial Intelligence Intern — CantiLever Pvt. Ltd. - Contributed to AI-based workflow and automation projects using Python and ML tools. - Supported data preprocessing and model development for intelligent decision-making systems. - Demonstrated strong problem-solving and collaboration skills while ensuring timely project delivery.	

Certifications, Achievements & Leadership

IBM SkillsBuild PBL (*Agentic AI*) | 4 ⭐ **Coder on CodeChef** | **Certificate of Academic Excellence** | **Letter of Recommendation** from *CantiLever* | **Team Lead – Smart India Hackathon Project (2024)** | **Event Coordinator – AI Renaissance (2024–25)**
